

# Artificial Intelligence, Real Productivity.

Go beyond scheduling. Weave your workforce with daily demand.

Leverage AI-powered forecasting to create schedules and analyze productivity.

Reduce labor costs while enhancing customer satisfaction.

Other providers set static schedules. Weave matches your workforce to fluctuating demand.

## Without Weave

- ✗ Limited Forecasting**  
Demand forecast based only on sales history or prior schedules
- ✗ Static Shift Planning**  
Template-based shift planning, disconnected from actual demand
- ✗ Stale Shift Assignments**  
Habit-based shift assignments, unaware of changing needs
- ✗ Unreliable Productivity Reporting**  
Limited, out-of-date or nonexistent productivity information
- ✗ Customer Service Blind**  
No visibility of customer service implications

## With Weave

- ✓ Intelligent Forecasting**  
AI-based forecasting, incorporating broad operational and external data
- ✓ Dynamic Shift Planning**  
Algorithm-powered shift planning to match the demand forecast
- ✓ Smart Shift Assignments**  
Algorithm-generated shift assignments based on manager preferences and employee productivity
- ✓ Clear Productivity Reporting**  
Live, detailed productivity dashboard, including financial impact assessment
- ✓ Transparent Customer Experience Impact**  
Fresh, relevant customer service tracking to drive a balanced performance assessment
